

REQUEST FOR SERVICE:

This section reports on the primary function of Emergency Medical Services, which is to provide ambulance transportation for sick and injured residents. The first table indicates the number of calls "Year to Date" by priority.

- CODE 1** A call that can be deferred without impact to the patient, i.e. going home from the hospital for a visit.
- CODE 2** A call that must be done at a certain time due to an appointment, i.e. bringing a patient to the hospital for diagnostics tests at 09:00.
- CODE 3** A call that is urgent because the patient needs medical attention but life or limb is not at risk, i.e. a simple broken leg.
- CODE 4** A call for life and death emergency or unknown situation.
- CODE 8** A call where the ambulance is asked to stand by at a specific location, i.e. a fire call.

CODE	Jan	Feb	Mar	Apr	May	Jun	July	Aug	Sep	Oct	Nov	Dec	YTD

Total	123	61	87	95	103	85	109	96	110	100	83	129	1181

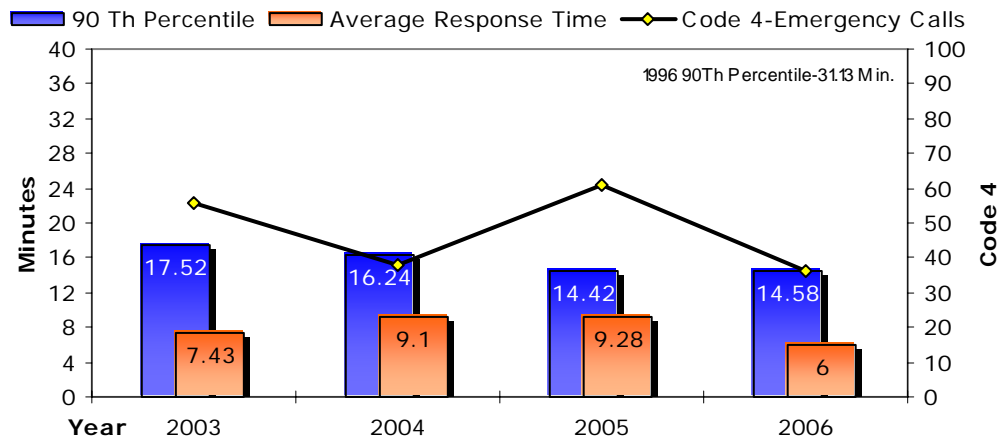

90TH PERCENTILE AND AVERAGE RESPONSE TIMES:

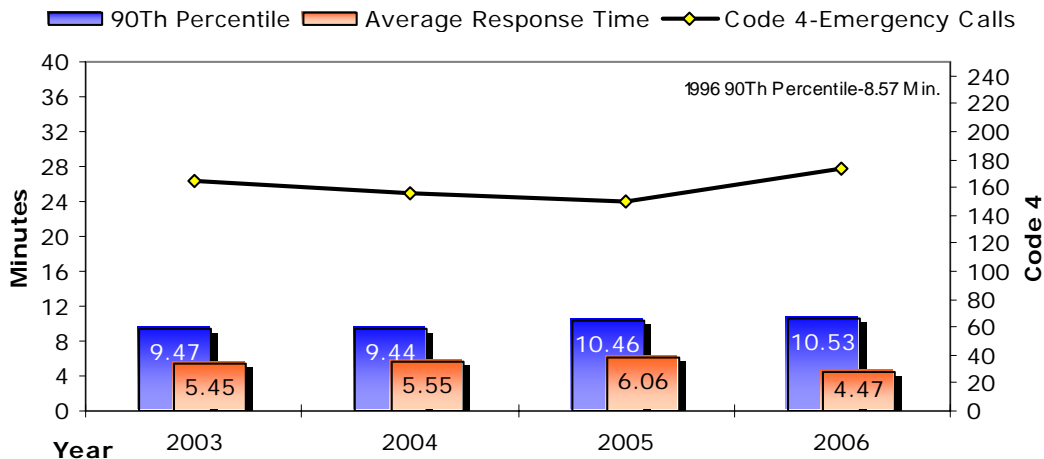

The Ministry of Health and Long Term Care has legislated that response times must be equal to or better than prior to 1997 when the Local Services Realignment initiative was announced. Although MOH-LTC requires only an across the district measurement, we monitor response times in each geographic community. 90th percentile means that 90 percent of the Code 4 calls were responded to in less than the posted time.

1996 DISTRICT 90TH PERCENTILE: 12:41 minutes
SERVICE LEVEL: Basic Life Support

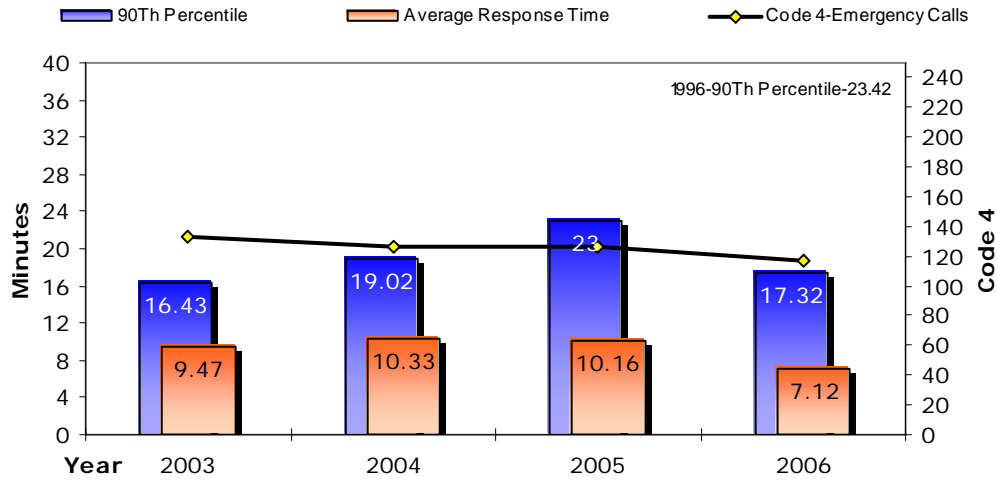

TOWN OF BEARDMORE

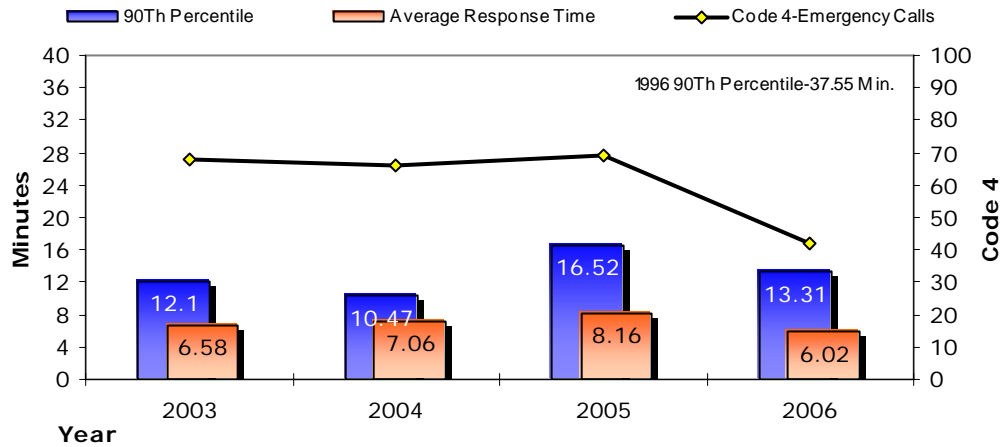

TOWN OF GERALDTON

TOWN OF LONGLAC

TOWN OF NAKINA

90TH PERCENTILE REACTION TIMES FROM NOTIFICATION TO DEPARTURE FROM STATION:

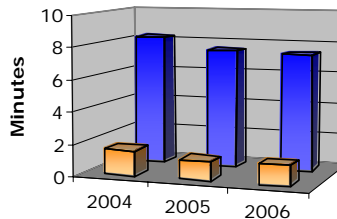

Superior North EMS monitors how quickly staff responds to emergencies while on duty and, if applicable, while on-call away from the station. Target time for on-site is 90 seconds and for on-call it is 8 minutes.
